

AERIS Technical Security Review

Executive Summary

This document provides a technical overview of the AERIS intelligent automation and VAPT interface.

Active Components

- 1. **Neural Intent Classifier:** Multi-class PyTorch intent classification.
- 2. **Playwright PDF Engine:** Dynamic head-less Chromium printing.
- 3. **Consistency Guards:** Policy validation layers.

Technical Details

Phase	Goal	Status
Phase 1	Brand Rebranding	Completed
Phase 6	PDF Engine Integration	Completed
Phase 7	Neural Network Core	Pending

Sample Analysis Code

```
def check_anomaly(score: float, threshold: float = 0.85) -> bool:
    return score > threshold
```
